

ANSI SQL Using MySQL Exercises [1-10]

1. User Upcoming Events

Show a list of all upcoming events a user is registered for in their city, sorted by date.

The screenshot shows a MySQL IDE interface. At the top, there is a toolbar with various icons and a dropdown menu set to "Limit to 1000 rows". Below the toolbar, a SQL query is entered in a text area. The query is as follows:

```
1 • SELECT u.full_name,u.city,r.event_id, e.title,e.city,e.start_date
2   from registrations r
3   join Events e on r.event_id = e.event_id
4   join users u on r.user_id = u.user_id
5   where e.status = 'upcoming'
6   and u.city = e.city
7   ORDER BY e.start_date
8
```

Below the query editor, there is a "Result Grid" section. It includes a "Filter Rows:" input field, an "Export:" button, and a "Wrap Cell Content:" checkbox. The results are displayed in a table with the following columns: full_name, city, event_id, title, city, and start_date. The table contains two rows of data:

full_name	city	event_id	title	city	start_date
Alice Johnson	New York	1	Tech Innovators Meetup	New York	2025-06-10 10:00:00
Ethan Hunt	Los Angeles	3	Frontend Development Bootcamp	Los Angeles	2025-07-01 10:00:00

2. Top Rated Events

Identify events with the highest average rating, considering only those that have received at least 10 feedback submissions.

```

56 • SELECT
57     e.title,
58     AVG(f.rating) AS average_rating
59 FROM Feedback f
60 JOIN Events e
61     ON f.event_id = e.event_id
62 GROUP BY e.event_id, e.title
63 HAVING COUNT(*) >= 10
64 ORDER BY average_rating DESC
65 LIMIT 1;
66

```

3. Inactive Users

Retrieve users who have not registered for any events in the last 90 days.

```

• SELECT *
FROM Users u
WHERE u.user_id NOT IN (
    SELECT r.user_id
    FROM Registrations r
    WHERE r.registration_date >= CURDATE() - INTERVAL 90 DAY
);

```

Count how many sessions are scheduled between 10 AM to 12 PM for each event.

```

101 • SELECT e.title, COUNT(s.session_id) AS count_of_session
102 FROM events e LEFT JOIN sessions s on e.event_id = s.event_id
103 WHERE TIME(s.start_time) BETWEEN '10:00:00' AND '12:00:00'
